

Cooler & Exchange Services

U-Tube and Straight Bundles

Since 1982, Best-Aire, LLC has been servicing all makes and models of air compressors. Best-Aire's dedication to providing reliable parts and service at the most competitive prices for industries has made Best-Aire the leader in compressor technology. With over 50,000 square feet of facility and warehouse space, Best-Aire is capable of supplying the highest quality of service and products to customers quickly and easily.

Quality Workmanship

If you have a leaking or plugged cooler, Best-Aire has the solution for you. Best-Aire has the solution you need for unexpected problems, which may occur with your cooling and exchanger systems. Best-Aire can repair heat exchangers, condensers, inter-coolers, after-coolers, oil coolers, U-tube and straight bundles. From a single defective tube to fabricating a complete unit, Best-Aire's quick and reliable service will get the job done, feel assured we have you covered!

Expertise

Best-Aire's knowledge, expertise and flexibility ensures a trouble-free system. Best-Aire can restore leaking coolers, which cause cylinder damage, destruction to pistons, piston rings, and rods plus rod packing. By maintaining your cooling and exchanger systems on a continuous basis, you could prevent fire or explosions from occurring, which could cause harm to equipment or even personnel. By maintaining your systems you can increase capacity, keep discharge temperatures, and increase the life of a piston, piston rings, rider ring, valve, and cylinders.

- 24-hour Emergency Service
- Eddy Current Testing
- Complete Cleaning
- Hydrostatic Testing
- Re-tubing
- Manufacturing of new Tube Nest and Shell
- Upgrading of materials to improve Capacity
- Expertise for all types of Coolers and Exchangers
- Field Services or In-house Repairs

Leader in Compressor Technology

Best-Aire has demonstrated the leading edge of air compressor technology, while keeping pace with the innovations that have set the standards for centrifugal, reciprocating and rotary screw air compressors.

Best-Aire offers a total solution for your compressed air system and can return any type and model of compressor to its original OEM specification.

Best-Aire is geared to provide you convenience. Service can be on-site or in one of our service centers.

We've got the reputation for solving the toughest problems, on time, within specifications and within budget.

Mechanical Repairs Include:

- Compressors
- Pumps
- Vacuum Pumps
- Heat Exchangers
- Remanufacturing
- Inter-coolers, After-coolers
- Valves

Other Services:

24-Hour Emergency Service, Project Supervisors, Overhauls, Portable Tools and Machinery, Cylinder Boring and Honing, Flange Facing, Grinding, Turbines, Engines, Fabrication, Engineering, Balancing, Casting Repairs, Welding, Grouting, Valve Reconditioning, Metal Spray, Metal Stitching, Spin Babbiting, Remanufactured Compressors.

Special Services:

Preventative Maintenance Service, Consulting Services, Training Services, Machine Signature, Magnetic Particle, Dye Penetrate.

New Equipment Sales Include:

- Best-Aire Integrated Controls for Compressors
- Gardner Denver
- Rotary Screw and Reciprocating
- Rotary Vacuum Packages
- AirCel Filters, Dryers, and other accessories
- Parker Filtration Products
- Air/Tak Compressed Air system Products
- Bekosplit water treatment systems
- Portable air compressors

Rental Units Available

We are your single source for complete compressor services.
